Empathy Map

Create an empathy map to understand your customer/user from four perspectives — what they Say, Think, Do, and Feel — in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I just want a quick decision." • "Why was I rejected without any explanation?" • "I have a stable income — this should be simple."	THINKS • Is my credit history really that bad? • Will this application affect my credit score? • I hope the process is actually fair and unbiased.
CREDIT CARD APPLICANT <i>(Role / User Type)</i>	
DOES • Submits income and identity documents online • Checks application status repeatedly • Compares offers across other banks in parallel	FEELS • Anxious about the possibility of rejection • Hopeful while the decision is pending • Frustrated by long, opaque wait times
