

Solution Architecture

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

A high-level visual representation of the Credit Card Approval Prediction system's architecture, spanning the Presentation Layer, Application Layer, and Data Layer.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Renders the applicant input form and displays the prediction result to users.	HTML5, CSS3, Jinja2 (Flask templates) Flask routing (app.py)
API Gateway	Routes incoming HTTP requests to the appropriate Flask view/endpoint for scoring or dashboard rendering.	
Microservices	Validates input, authenticates users, runs the trained ML model to predict approval, and calls the external Watson ML endpoint.	Flask-Login, scikit-learn, XGBoost, IBM Watson ML API
Database	Stores the training dataset and serialized trained model artifacts used for scoring.	CSV dataset, Pickle / Joblib model files
