

Project Demo Planning

Date	15 March 2024
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the Credit Card Approval Prediction project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the team and explain the problem: manual credit card application review is slow and error-prone for banks	2	Zaamir Hanan Mujeeb (Team Lead)
2	Solution Overview	Explain the ML-based approach using Logistic Regression, Random Forest, XGBoost, and Decision Tree to automate approval decisions	3	Mohana Krishna Reddy
3	Data Preprocessing & Model Training Walkthrough	Show data cleaning, feature engineering (binary payment status labels), and comparison of the four trained models	4	Rushikesh Kasthuri
4	Live Feature Demonstration - Web Application	Demonstrate the Flask web app: enter applicant details and get an instant approval/rejection prediction	5	Shaik Asliman Thaslimaan
5	Cloud Deployment Demonstration	Showcase the IBM Watson Machine Learning deployment providing real-time, cloud-hosted predictions	3	Deepak Bellam
6	Q&A Session	Address evaluator questions on model performance, feature engineering, and deployment approach	3	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain how manual credit approval review is inefficient and error-prone at scale
2	Solution Overview	Highlight the four ML models used and the Flask + IBM Watson ML architecture
3	Live Feature Demonstration	Run all three scenarios: analyst screening, compliance high-risk review, and customer self-service check
4	Q&A Session	Answer evaluator questions and clarify technical and deployment details
